

Burlington Cast Iron Radiators:

The Burlington is a popular choice for traditionally styled new build or refurbished period properties, where it can replace outdated or antique radiators with minimum disruption to the fabric of the building or the existing pipe work.

The scrolled relief patterned Burlington compliments the traditional styled property.

Supplied in a single height of 838mm assembled Burlington radiators can be supplied to site in lengths from 3 to 21 sections. Further sections can be assembled on site for longer finished radiators
