

Gyro:

Gyro

Available in two styles, straight or angled, the [Gyro](#) is the perfect choice to complement modern styles and towel rails. The matching lockshield and wheelhead bodies are styled in refined chrome but to ring the changes why not consider one of the following attractive coloured heads?. For a more classic look, chrome and gold coloured heads complete the range. These valves are available in a standard 15mm connection size.

Gyro TRV

In an environment where economy and precision are required, the [Gyro TRV](#) is an ideal choice. Connected to a standard 15mm pipework system, Gyro TRV gives fingertip control of heat settings, room by room, independently of each other. Perfect where a controlled heat setting is important, Gyro TRV is available in two styles, straight and angled, to suit most applications.

NOTE: the shroud for the TRV sensor is available in white or chrome (extra charge) only.

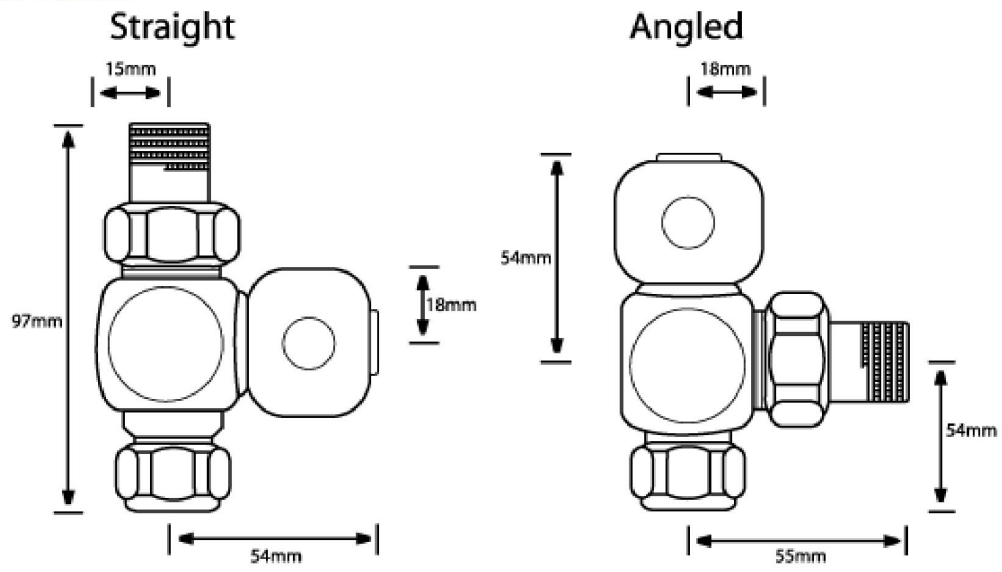

Format Straight or Angled

Finish Gold and chrome.

Coloured heads: Available in 8 shades to match the RAL colour range of selected radiators, choose from matt or gloss black, brown, blue, red, green, yellow, ivory or white (standard supply is white).

Connection 15mm
