

THERMIC designer valve set

THERMIC, Belgian top manufacturer of high-quality designer radiators, known for its innovative heating-technology, trendsetting design and unsurpassed quality. As the trendsetter in the field of designer radiators Thermic presents its *new designer valve set* !

THERMIC designer valve set is delivered *standard* with a *luxury thermostatic head* and can be used by both connection 1MM8 and connection 1-8.

- In case of universal connection **1MM8**, a designer valve set is possible with both wall connection (square) and floor connection (straight).

Square
(Available in white, Pergamon, chrome and stainless steel)

Straight
(Available in chrome)

Attention:

The designer valve set is only available in combination with the new universal connection (1MM8) !

Following radiators are available with this new universal connection:

HK(R)M / HD(R)M / H(R)BM / H(R)BM-C / V(Z)-I / V(Z)-CHR / ZV(-R) / XTEND.

Other Thermic-radiators maintain the universal connection 1mm8.

- In case of connection **1-8**, there is the possibility to connect at the left (square left) or to connect at the right (square right).

Square left
(Available in white and chrome)

Square right
(Available in white and chrome)

THERMIC-radiators are manufactured according to the **most modern production methods**. Result: an impeccable quality and a perfect finish. THERMIC-radiators are welded with **invisible weld seams** by fully automatic robots. Using the same techniques as in the modern automotive industry, they are primed using electrophoresis and then painted by means of an electrostatic powder coating.

THERMIC, proud owner of the **ISO 9001**-certificate, offers a guarantee of **10 years on leakages and of 10 years on the painting**.
